A 3D visualization of a blockchain chain is shown against a dark blue background. The chain is composed of numerous interconnected blocks, each represented by a grid of blue and orange points. The blocks are arranged in a series of loops and curves, creating a sense of depth and movement. The text "Blockchain: How Does It Work?" is overlaid in the center of the image in a large, white, bold, sans-serif font.

**Blockchain:
How Does It Work?**

**Blockchain is above all a database
which has a special structure:**

**it is distributed and aims to create a
network between different actors who
can then share secure, engaging and
auditable information.**

1

Distributed

2

Tamperproof

3

Auditable

4

Transparent
